

Dr. Byron Crowe is Chief Medical Officer at Doctronic, the nation's leading platform for AI-native care. In this role, he leads clinical strategy and the development of Doctronic's technology and care delivery models supporting a nationwide physician practice.

Prior to Doctronic, Dr. Crowe was CMO at Solera Health, where he built and scaled a national network of digital health programs for payers and employers, making it easier to connect members with evidence-based support for chronic conditions. He also served on the faculty of Harvard Medical School, conducting foundational research on AI performance in clinical reasoning and authoring policy recommendations on the use of AI in medicine. In 2024, he was named one of Modern Healthcare's "40 Under 40" innovators. He is a graduate of Emory University School of Medicine, holds a Master's in clinical informatics management from Stanford and is dual-board certified in internal medicine and clinical informatics. In his free time, he enjoys triathlon, mountaineering, and space history.
